

# Pure React

DAVE CEDDIA

# Contents

<b>1</b>	<b>Introduction</b>	<b>6</b>
	Why Just React? . . . . .	9
	How This Book Works . . . . .	10
	Environment Setup . . . . .	13
	Debugging Crash Course . . . . .	16
<b>2</b>	<b>Hello World</b>	<b>18</b>
<b>3</b>	<b>JSX: What and Why</b>	<b>21</b>
	What Is JSX? . . . . .	21
<b>4</b>	<b>Working With JSX</b>	<b>26</b>
	Composing Components . . . . .	26
	“If” in JSX . . . . .	33
	Exercises . . . . .	36
<b>5</b>	<b>Example: Tweet Component</b>	<b>40</b>
<b>6</b>	<b>Props</b>	<b>54</b>
	Passing Props . . . . .	54
	Receiving Props . . . . .	56
	Communicating With Parent Components . . . . .	58

<b>7 Example: Tweet With Props</b>	<b>60</b>
ES6: Template Strings . . . . .	62
What Exactly Should Be Passed as a Prop? . . . . .	65
Guidelines for Naming Props . . . . .	66
<b>8 PropTypes</b>	<b>71</b>
Documentation and Debugging In One . . . . .	71
How Do I Validate Thee, Let Me Count the Ways . . . . .	74
Example: Tweet with PropTypes . . . . .	79
PropTypes as Documentation . . . . .	82
Exercises . . . . .	84
<b>9 Children</b>	<b>86</b>
Different Types of Children . . . . .	88
Dealing with the Children . . . . .	88
PropTypes for Children . . . . .	89
Customizing Children Before Rendering . . . . .	90
Exercises . . . . .	92
<b>10 Example: GitHub File List</b>	<b>94</b>
The “key” Prop . . . . .	99
Exercises . . . . .	108

<b>11 State in Classes</b>	<b>112</b>
Example: A Counter . . . . .	112
setState Is Asynchronous . . . . .	115
Shallow vs Deep Merge . . . . .	117
Cleaner Syntax for Class Components . . . . .	118
Handling Events . . . . .	120
Exercises . . . . .	121
<b>12 The Component Lifecycle</b>	<b>122</b>
Phases . . . . .	122
Mounting . . . . .	126
Rendering . . . . .	127
Unmounting . . . . .	128
Error Handling . . . . .	128
<b>13 API Requests in React</b>	<b>129</b>
Choose an HTTP Library . . . . .	129
Fetch Data and Display It . . . . .	131
Exercises . . . . .	134
<b>14 State in Functions</b>	<b>135</b>
Introducing Hooks . . . . .	135
The useState Hook . . . . .	135

The “Magic” of Hooks . . . . .	138
Rules of Hooks . . . . .	141
Update State Based on Previous State . . . . .	141
State as an Array . . . . .	143
State as an Object . . . . .	144
Exercises . . . . .	146
<b>15 Thinking About State</b>	<b>147</b>
What to Put in State . . . . .	147
Thinking Declaratively . . . . .	149
Where to Keep State . . . . .	152
“Kinds” of Components . . . . .	156
<b>16 Input Controls</b>	<b>157</b>
Controlled Inputs . . . . .	157
Uncontrolled Inputs . . . . .	160
Exercises . . . . .	162
<b>17 The useReducer Hook</b>	<b>164</b>
What’s a Reducer? . . . . .	164
A More Complex Example . . . . .	166
So... is Redux Dead? . . . . .	170
Exercises . . . . .	172

<b>18 The useEffect Hook</b>	<b>173</b>
Limit When an Effect Runs . . . . .	174
Only Run on Mount and Unmount . . . . .	177
Fetch Data With useEffect . . . . .	179
Re-fetch When Data Changes . . . . .	181
Making Visible DOM Changes . . . . .	184
Exercises . . . . .	185
<b>19 The Context API</b>	<b>186</b>
Before: A Prop Drilling Example . . . . .	186
The “Slots” Pattern . . . . .	190
Using the React Context API . . . . .	192
The “Render Props” Pattern . . . . .	197
Advanced Context Patterns . . . . .	198
The useContext Hook . . . . .	201
<b>20 Example: Shopping Site</b>	<b>204</b>
Create ItemPage . . . . .	214
Create the Item Component . . . . .	218
Create the CartPage Component . . . . .	225
Exercises . . . . .	236
<b>21 Where To Go From Here</b>	<b>239</b>
